

SELECTOR VALVE UPDATE

Fike is excited to announce an update to the selector valve product offering. Beginning May 1st, new assemblies will be replacing existing inventory and will be available for order.

These selector valves have FM approval and are UL listed for use with Fike fire suppression systems and also come in a broader range of sizes. For chemical agents like ECARO-25 and FM-200 selector valves can range from 1" to 4". For inert agents like PROINERT or Fike CO₂ the selector valves range from 1" to 3".

Previous generation selector valves were reset by way of a pop-off valve that released pressure. These new selector valves will remain in an activated state until reset by physically turning the valve's operating shaft. The visual indicators have been simplified by removing the large plastic topper with red/green notification and utilizing a slot/arrow indicator instead.

Part numbers are as follows:

Part Number: 70-396-XX-XXX	
A BCD	
A =	10 – 1" NPT (25 mm)
	15 – 1 ½" NPT (40 mm)
	20 – 2" NPT (50 mm)
	30 – 3" NPT (80 mm)
	40 – 4" NPT (100 mm)
B =	C – Carbon Steel Body
	S – Stainless Steel Body
C =	D – UVO Completer Kit
	S – Pneumatic Relay Completer Kit
	M – UEA Completer Kit
D =	F – Nitrogen Actuator Assembly (Filled)
	U – Nitrogen Actuator Assembly (Unfilled)

Chemical Agents

Part Number: 70-395-XX-XX	
A BC	
A =	10 – 1" NPT (25 mm)
	15 – 1 ½" NPT (40 mm)
	20 – 2" NPT (50 mm)
	30 – 3" NPT (80 mm)
B =	C – Carbon Steel Body
	S – Stainless Steel Body
C =	D – Release Fitting with UVO Completer Kit
	S – Release Fitting with Pneumatic Relay Completer Kit
	M – Release Fitting with UEA Completer Kit

Inert Agents
